

## **1<sup>st</sup> RULE, FOLLOW THE RULES!**

Follow the instructions below and help us to make events at Mugello Circuit and the day by day life more sustainable.

## **...DURING THE EVENT:**

### **RECYCLING!**

Do not throw waste on the ground. Inside the paddock area and in the other areas of the circuit you will find the recycling bins.

### **MOVE OVER!**

Don't park your motorbikes and cars in parking spaces reserved to people with disability and remember also to not block the necessary access to them.

### **KEEP USING YOUR HEAD, EVEN WHEN YOU HAVE FUN**

Still having sustainable behavior even when you're having fun, not only at home. Don't waste energy and water and dispose just enough.

### **STOP CIGARETTE BUTTS LITTERING!**

Do not throw down, be sure it is off and you can throw them in the appropriate containers for butts on the terraces and near the separate waste bins.

### **MOVE SUSTAINABLY**

To reach the circuit please take the car only when it is strictly necessary or carpooling with others. Bicycles, scooters, public transportation and sharing systems are more sustainable smart mobility alternatives. Take the car only if it is not avoidable, or if it is electric or hybrid powered car, and share the journey with your friends.

## **...AND EVERY OTHER DAY:**

### **TURN OFF THE ELECTRONIC DEVICES**

Don't leave them on stand-by. Also disconnect cellphone chargers and transformers from the grid: they consume even when they are not connected to any device or when connected devices are turned off.

**USE ECO-SAVE LED LIGHT**

Consume little and work long. Remember to clean lamps and light bulbs at least once a year you will have more light at no cost.

**REDUCE FOOD WASTE**

Favor good food preservation: In your fridge there's a right shelf for each food. When you go shopping buy only the necessary.

**COOKING LOW IMPACT**

Put the lid on the pan when you cook, you can save up to a quarter of the energy needed for cooking.

**TAKING THE STAIRS!**

Avoid using lift and prefer taking the stairs, in addition to saving energy that is also good for your health!

**DON'T WASTE WATER!**

Don't let the water run unnecessarily, for example while you soap or you are brushing.

**USE APPLIANCES FULLY LOADED**

Also favor low temperature washing (change from 90°C to 60°C allows you to save up to 30% of electricity).

**MOVE SUSTAINABLY!**

Use the car only when it is strictly necessary or carpooling with others. Bicycles, scooters, public transportation and sharing mobility are more sustainable alternatives. Electric and hybrid powered vehicles are suggested.

**SETS CORRECTLY HEATING SYSTEM**

Don't set the heating system at high temperatures but keep the temperature around 20°C. If in your room it's too hot, do not open the windows but lower temperature by regulating thermostat.

**DISPOSE ONLY THE NECESSARY**

Before throwing good, consider to donate it to others or resell it, in order to increase the reuse practices. If it is to be thrown away, make separate waste collection in order to recycling all that is recoverable.
